

# **INFORMATION SCIENCES INSTITUTE**

## **Center for Rapid Automated Fabrication Technologies (CRAFT)**

### **Industrial Affiliates Program**

Information Sciences Institute (ISI) works closely with corporations through a variety of intellectual partnerships, striving together to invest in innovation. Such collaboration provides support for pioneering researchers in an environment that fosters intellectual freedom and the entrepreneurial spirit.

#### **Membership**

Membership in the CRAFT Industrial Affiliates Program provides corporations and individuals with priority access to breakthroughs in rapid automated fabrication technology. Annual membership is a gift of \$50,000 and provides the following benefits:

- Membership on the CRAFT Technical Advisory Board.
- Priority invitations to an annual briefing conducted at ISI highlighting current advancements in CRAFT research and new technology applications.
- Direct access to leading CRAFT researchers intimately familiar with rapid automated fabrication technology and applications.
- Access to CRAFT undergraduate, graduate and doctoral students - trained in rapid automated fabrication technologies, and familiar with a cross-disciplinary, team-working environment for recruitment or internship purposes.
- Priority access to research papers, reports, periodic newsletters and other publications on rapid automated fabrication technologies.
- Advance invitations to CRAFT conferences, workshops, and seminars dealing with rapid automated fabrication technologies.
- Opportunity to network and interact with other CRAFT Industrial Affiliates members in an open and collaborative environment.
- Recognition of your corporate support in print and online materials describing CRAFT technologies.
- Direct access to an ISI Corporate Relations Officer to arrange collaboration opportunities specifically suited to your corporation's interests.
